Niagara Falls

Written by Lee-Ann Lear

Niagara Falls is an amazing place to visit!

The falls are on the Niagara River. At the top of the falls, the river is fast and wide. The water swiftly drops all the way to the bottom of the falls, where it hits the rocks, making a huge spray and lots of mist.

4

There are a number of things to see and do at the falls, including an extremely long zipline!

6

You can go on a hike along a river trail to watch the river rapids. The waves are huge and wild, and they crash on the rocks! The water is raging and deep, so you need to stick to the rules and stay on the deck to keep safe!

8

After the rapids, you can make your way into the tunnels that run behind the falls. In one place, there is a ledge where you can watch the water thunder past and plunge onto the rocks at the bottom.

10

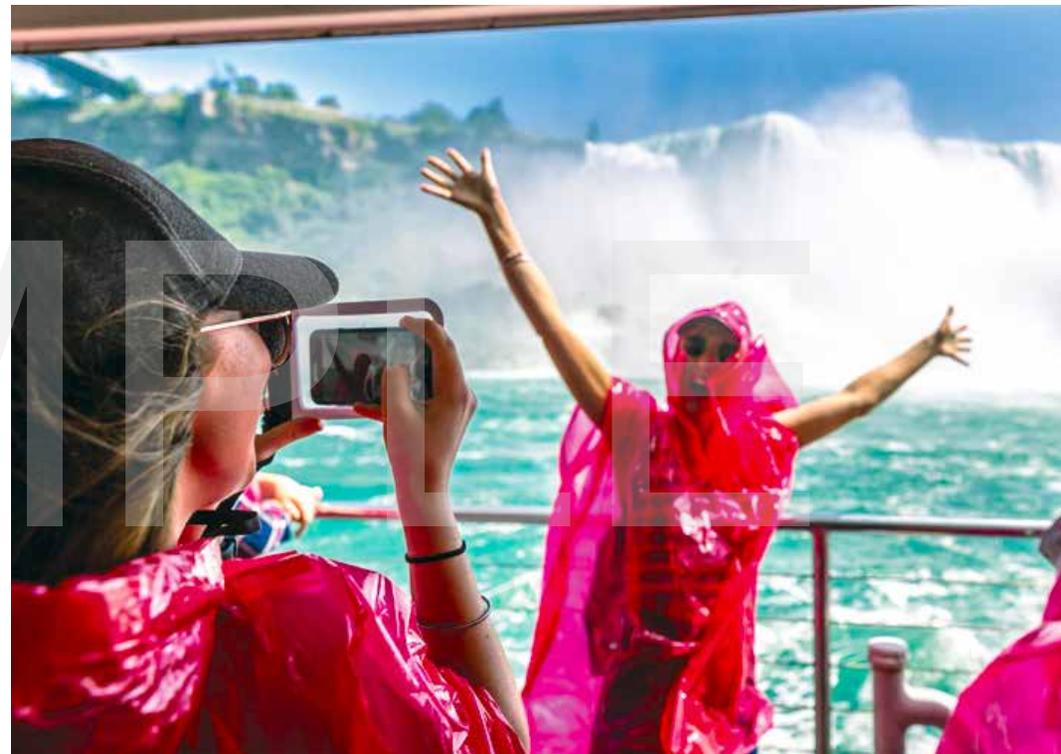

The tunnels end at the base of the falls. You can stop on the platform and watch the water dropping freely from the edge. The dropping water makes a lot of mist!

12

At the end of the visit, you can go on a misty ride to get a bit closer to the falls. The wind, mist, and waves from the falls make it an amazing ride!

14

Niagara Falls is a lovely place to visit!
