The webs on a duck's feet help it swim. Webs can help a duck gain speed and steer as it swims!

Why

Written by Lee-Ann Lear

Bobcats

Written by Lee-Ann Lear

Bobcats are a kind of wild cat.
Bobcat tails seem to be cut,
or “bobbed”. That is why they
are called “bobcats”.

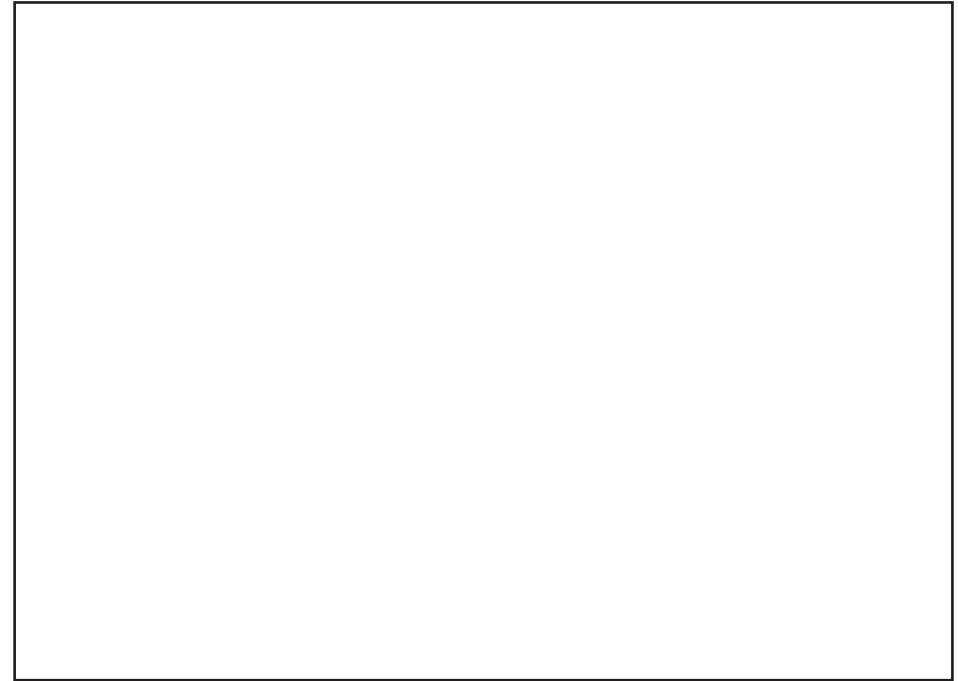

2

You may spot a bobcat sitting
or resting way up on a branch
in a tree. Bobcats love trees!

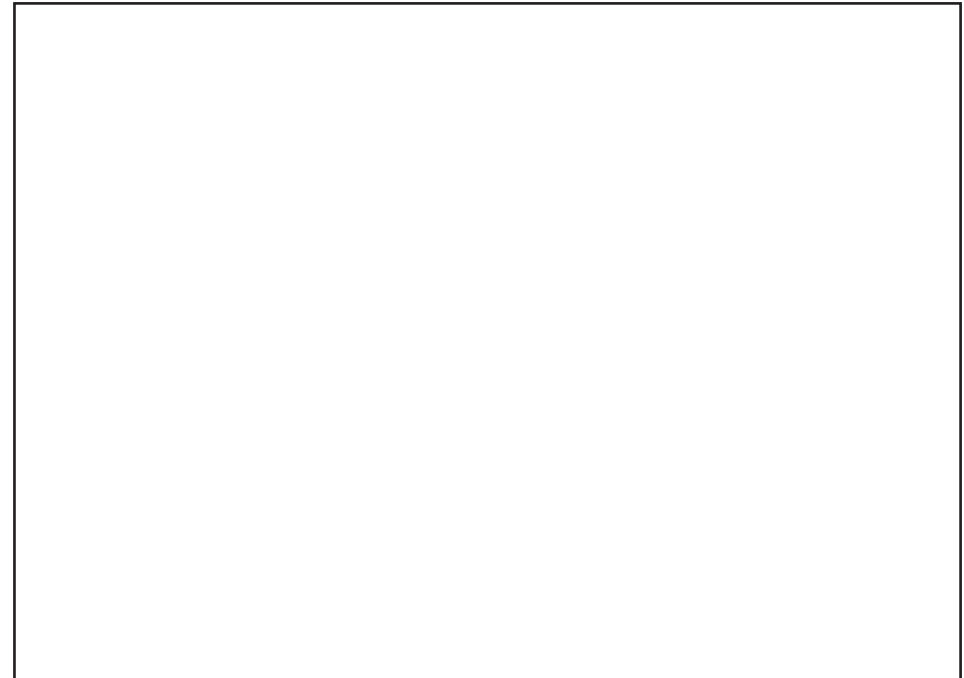

When a bobcat has a baby,
it is called a bobkitten.
A bobkitten will stay with its
mom until it can hunt by itself.

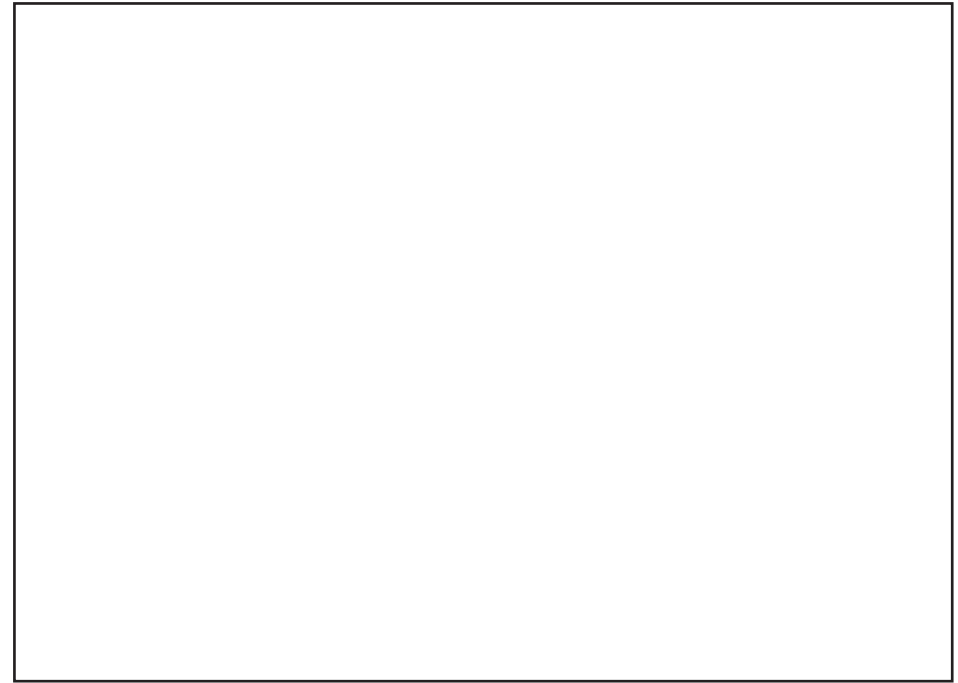

14

Most bobcats begin hunting as
the sun sets. When the sun is
up, bobcats tend to sleep. In
winter, bobcats may adapt and
hunt in the day when it is
less cold.

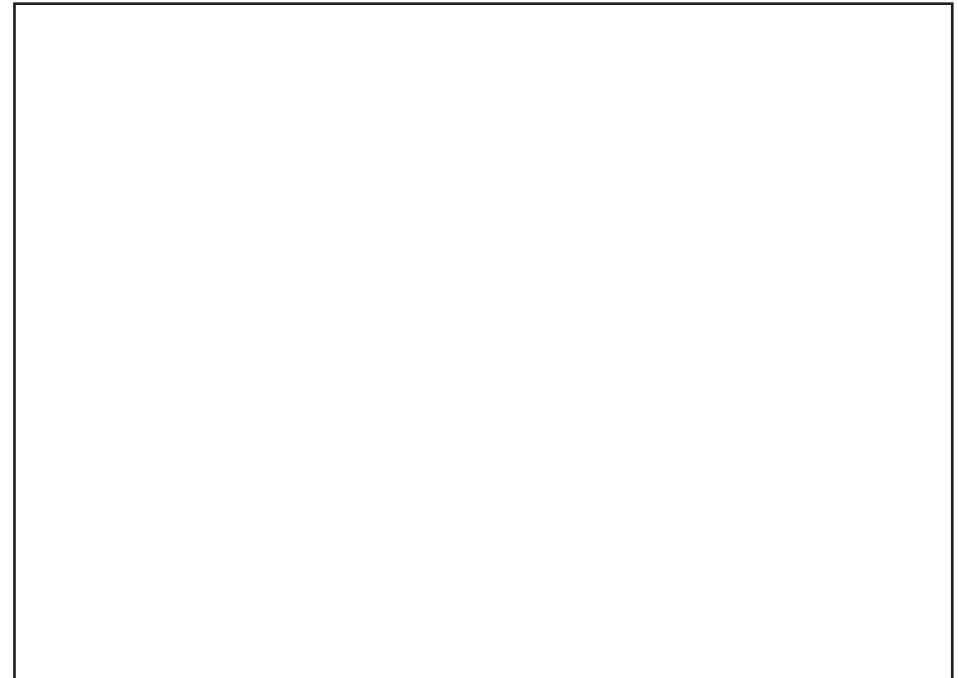

10

Bobcats may seem soft and sweet, but they are not pets. Do not try to pet a bobcat! Bobcats are big, strong, and bold!

4

Bobcats live in dens. A bobcat's den may be in a tree trunk, on a rock ledge, or under a bush.
